# 1. Introduction

## 1.1 Blockchain and Web3.0 Gaming Markets :

Galaxian is the first crypto-native platform where users can trade over 500 assets, including crypto, forex, stocks, ETFs, futures, options, and bonds — all in one place. Our goal is to create the industry's first crypto trading super app. The community earns daily staking rewards in \$GLXN and USDT from up to 70% of the trading fees, making Anconnect the most rewarding trading platform and the ultimate bridge between crypto and traditional finance.

## 1.2 The Future of Web3.0 & AI :

The convergence of Web3 and AI technologies holds significant potential to reshape the digital landscape, moving towards a more decentralized, intelligent, and user-empowered future. While Web3 emphasizes decentralization, transparency, and user empowerment, AI brings intelligence, efficiency, and improved user experiences to the space. This synergy is expected to drive innovation in various areas, including cybersecurity, decentralized finance (DeFi), and the development of autonomous decentralized organizations (DAOs).

Name	Galaxian
Symbol	\$GLXN
Network	Binance Smart Chain
Total Supply	10 Billion

## 2. Problems

### 2.1 The Frustration of Fragmented Trading Platforms :

How often have you spotted a great trading opportunity but lacked the right tools, platform, or knowledge to take advantage of it? You are not alone. Research shows that most active traders use at least three different platforms to access various asset classes like stocks, commodities, crypto, and ETFs (Source: 2023 Investment Trends Report). This complexity leads to delays and inefficiencies, which can be the difference between profit and loss for a trader. A 2025 study by The Block Research found that over 60% of crypto traders feel frustrated by constantly switching between exchanges just to trade across different asset classes. At Anconnect, we believe financial markets are complex enough, and executing trades shouldn't add to the challenge.

### 2.2 Crypto Trading Became Complicated :

With millions of tokens created in 2025-26 (Source: CoinMarketCap), crypto has become more complex than ever, with centralized and decentralized exchanges, DeFi, and an ever-growing number of blockchains. We now have Ethereum, Solana, BSC, Tron, Base, and countless others, each building its own ecosystem and fighting for your attention. Staying active across all these networks is nearly impossible, especially with the knowledge required to navigate different wallets, gas fees, bridges, and liquidity pools. Just keeping up with trends like Layer 2 solutions, meme coins, gaming tokens, AI coins, real-world asset (RWA) tokens, and cross-chain interoperability can feel overwhelming.

# 3. Solutions

## 3.1 The Unified Trading Experience :

Galaxian simplifies modern trading with a single, streamlined, and rewarding crypto-native platform for all major global financial markets. Users can trade crypto, forex, stocks, ETFs, and commodities effortlessly without switching between multiple brokerages or platforms.

## 3.2 Key features :

### All-in-One Web 3.0 Gaming

Web3.0 Gaming over 500 AI Crypto Trading tokens across multiple markets.

### Swap Instantly

Swap between different asset classes instantly.

### Low Fees & High Rewards

Earn daily staking rewards in GLXN and USDT from every trade made on the platform.

### Advanced Security

Cutting-edge security measures ensure a safe and reliable trading experience.

### Seamless User Experience

No need for multiple accounts or switching between platforms.

### Experienced Team

Galaxian is lead by a team with over 25 years of fintech and gaming experience.

## 4. Market Opportunity

**Less Than 1% of global Gaming is crypto :**

In 2025, crypto represented just 0.87% of global trading volume, averaging \$84.3 billion daily, compared to \$7.5 trillion in the Forex market. Despite this, crypto remains the fastest-growing asset class, offering tremendous opportunities for expansion.

With global financial assets exceeding \$500 trillion across various financial products, traders are seeking a unified platform that offers effortless access to multiple asset classes. Anconnect is leading this evolution, providing a crypto-native solution that connects Web3 users to the broader financial markets..

# 5. Why Now

## Crypto is Going mainstream :

Traders are increasingly embracing crypto alongside stocks and other asset classes. Gaming lovers are expanding into other markets. Traders who typically buy altcoins or meme coins are also investing in stocks like GameStop and AMC.

Trading is becoming more complex. Managing multiple asset classes, blockchains, and platforms adds layers of difficulty for traders.

Traditional finance is adopting blockchain

Major banks and asset managers are launching blockchain-powered products, bridging the gap between legacy systems and Web3.

High demand for a unified trading solution.

Traders are demanding an all-in-one solution to execute trades faster across diverse markets and assets.

## 6. Growth Strategy

### GLXN Token

Attract \$GLXN holders who trade exclusively on Galaxian.

### Staking Revenue Sharing

Attract users with passive staking rewards in \$GLXN and USDT.

### Influencer Collaborations

Partnering with top financial and crypto influencers.

### Referral Program

Rewarding users for introducing and attracting new traders.

### Strategic Listings

Expanding asset options to cover all popular assets globally.

# 7. Revenue Model

## 1. Trading Fees

Low with up to 70% redistributed

## 2. Listing Fees

Designed to attract quality assets

## 3. Subscription Services

Access to premium analytics and tools

## 4. Liquidity Provider Incentives

Strengthening liquidity through institutional partnerships

## 5. Copy Trading Fees

1.25% of profits generated by AI copy trading

## 8. Team & Experience

### **Experienced team working on Anconect.**

Galaxian is led by a team with 25 years of experience in fintech, trading, crypto and finance. With a strong track record of launching and scaling successful fintech and web3 projects, the team brings deep industry expertise, innovation, and a commitment to building a seamless trading experience that bridges traditional and digital finance. The goal is to create the most rewarding and efficient trading platform, where users can trade more than 500+ assets without delays or restrictions. By integrating advanced technology, deep liquidity, and a user-friendly interface, Galaxian aims to revolutionize trading and open new opportunities for crypto traders worldwide.

# 9. Community Feedback

## Traders love the platform :

In Q4 2025, we launched the early beta and invited over 20,000 crypto traders from the waitlist to participate. We gathered more than 1,000 reviews from traders, ranging from beginners to seasoned professionals with verified trading track records. The feedback was overwhelmingly positive, with an average rating of 4.79 out of 5. More than 72% of participants said they would use Anconnect exclusively, and over 86% stated they would use it regularly. We are using the feedback to refine our platform, making it as streamlined and user-friendly as possible to create the ultimate trading experience.

An\*\*\*

"That's it! Finally, someone who understands that trading is interconnected, especially in times when news and social media move the markets. With the range of assets available, BlockchainFX will soon be the number one choice for Web3 traders."

Pe\*\*\*

"Managing a 7-figure trading portfolio, I need a platform that's fast and reliable. Anconnect has been solid and easy to use, smooth execution, and works across different markets. Definitely worth using."

Jo\*\*

The app runs smoothly, and I like the tech behind it. The integration with different blockchains and asset classes is solid, and new features keep getting added. I'd rate it a 4.2 for now, and it absolutely has the potential to become the go-to trading platform

Ba\*\*\*

"I was hesitant at first because I'm new to crypto, and most trading apps feel overwhelming, but Anconnect has made everything easier. The interface is simple, and the educational tools and news are helpful. I still have a lot to learn, but the app feels like a great starting point."

Ma\*\*\*

"Been in crypto since 2023. \$ACN stands out with its speed and asset range. Not perfect yet, but it's already outperforming 95% of the market and it's still in beta!"

Se\*\*\*

"I'm trading on Anconnect lately since I'm deep in crypto and day trading stocks. Buying/selling is smooth, and the \$ACN rewards are a solid bonus. Better than I expected. Definitely a few steps ahead of the competition."

\*Only traders who opened an account and deposited could send us an review anonymously, ensuring the most accurate and genuine feedback.
